Re: Crew Recommendation

Mr. [REDACTED]

USC has enjoyed working with Mole Master Services as part of the High Priority Construction Project at the [REDACTED]. The site crew provided by Mole Master has performed in an exceptional manner throughout the recent work sessions. They were well prepared, well trained and performed their work safely. In addition, they were also attentive to the Owner's requests and concerned with the Owner's satisfaction with the work performed.

USC looks forward to working with your firm in the future and shall notify you if/when additional work is required.

Respectfully,

ULLIMAN SCHUTTE CONSTRUCTION, LLC

Subject: Silo Cleaning at ATS - [REDACTED]

Dan

I would like to take the opportunity thank you and your crew for the outstanding job that they did here at ATS on Thursday Oct. 25th. I appreciate working with us on short notice thus still doing a thorough job. Phil and the crew of guys were great and professional. They asked several questions before starting the job to ensure that they were giving the customer exactly the right service that we needed. They even cleaned the fill lines going inside the building to ensure all old material was not left behind. After speaking with our plastics engineer I can honestly say that we will use Mole Services again and recommend to our sister plants of this great service. Once again thanks for this great service.

Regards,

Subject: Excellent Job - Much Appreciated

Luke,

I just wanted to let you know how much Elementis appreciates the job done by your Mole Master crew that recently cleaned our residue silo. After our negative experience with [REDACTED] I must admit to having been skeptical about using similar services again. However, Phil, Russ, and Jacob made a believer out of me! I give my highest commendations to these men. They came very well equipped to do the job. I was impressed with their full compliance to rigorous PPE requirements that was necessary for this task. All three of the men honestly hustled to get the job done quickly, yet safely and I think actually inspired the best from my men who worked with them. And as you promised Luke, Phil maintained good communications with us throughout the job.

Luke, hopefully Elementis will not need this type service in the future, but rest assured that we will be back to Mole Master if we do based on the quality of work your organization has provided us in this case.

Thanks & Take Care,

[REDACTED]

letter of reference

Dan,

Phil [REDACTED], John [REDACTED] and Dan [REDACTED] were here last week. They did a very good job of cleaning the glass silos for us. I inspected the silos myself and I was quite pleased with the results. I would recommend the Molemaster crew to anyone needing this type of work.

Thanks again for the help,

[REDACTED] Unit Manager, PQ Sodium Silicate Plant.
